2% Interest on Credit Balances..... \$28.20
 8% Interest on Overdraft Balances.... 24.99
 Credit Account July 31 \$ 3.21

EXPLANATION.

Taking the above complicated case, in which a bank is allowed 2% interest on its credit balances and charged 8% interest on overdraft balances: Refer to 8% Table and find the interest on \$114,000 = \$24.99. Find 2% on \$514,800, in the same way, to be \$28.20. Jonesboro Bank should be credited the difference—\$3.21.

Smaller amounts (under \$100,000) may be found in one amount—for instance: What is the interest on \$97,700 at 6% for one day? Point off one figure from the interest on \$977,000 and we have \$16.06.

What is the interest on \$2,360 for one day at 3%? Point off two figures from the interest on \$236,000 and we have 19 $\frac{4}{10}$ c.

This may be used as a regular Interest Table—for instance: What is the true interest on \$13,420 for 50 days at 6%? \$13,420 \times 50 = \$671,000, the interest on which for one day is \$110.30.

The practical interest clerk will figure out other rules and short processes when he has used the Table for a short time.
